

PROFILE

I'm intermediate Front-end Web Developer. Possess strong leadership and communication skills with fluency in Arabic and English. I'm a problem solver, hard worker, and passionate about learning the latest technologies. I'm seeking to create web apps that serve millions of people with awesome UI/UX and responsive apps to help in their life and make them more efficient and easier.

PROJECTS

- **Smart-Brain** (<https://smart-brainssss.herokuapp.com>)
 - Smart Brain is a web app that uses the Clarifai API to locate a face in a picture.
 - Utilised: React, Particles js, Tilt, Tachyons, ES6, Node js, Express js, Bcrypt, PostgreSQL, Git, Github, Heroku
- **Instagram-Clone** (<https://instagram-clone-bd071.web.app>)
 - This is Instagram clone. give it a try! you can check it and create your own account to see the other users posts and interact with and also you can upload your first post to let everybody see it.
 - Utilised: React, Material UI, ES6, Firebase, Git, Github
- **Easybank** (<https://mahmoudzanoun13.github.io/easybank>)
 - This design developed for a landing page for a bank. it was just a challenge from FrontEndMentor.
 - Utilised: Html, Sass, ES6, Git, Github

Note: this design only fits on specific screens.
- **Calculator App** (<https://mahmoudzanoun13.github.io/calculator-app>)
 - This is a sample calculator. it was just a challenge from FrontEndMentor. it is fully responsive so, you can try it to calculate anything either from your computer or even your phone and also there are three themes so, you can do what you like whatever. you can try it.
 - Utilised: Html, Sass, ES6, Git, Github
- **Robo-Friends** (<https://mahmoudzanoun13.github.io/robofriends>)
 - Create-react-app project that, fetch APIs and allows the user search the fetch. it's for fun.
 - Utilised: React, Tachyons, ES6, Git, Github
- **Red-Store** (<https://mahmoudzanoun13.github.io/redstore>)
 - This is just a simple store landing page (e-commerce website).
 - Utilised: Html, CSS, Git, Github
- **Four-Cards** (<https://mahmoudzanoun13.github.io/four-card>)
 - This is just simple cards. it was just a challenge from FrontEndMentor. it is fully responsive.
 - Utilised: Html, Sass, Git, Github
