

PROFILE

I'm intermediate Front-end Web Developer. Possess strong leadership and communication skills with fluency in Arabic and English. I'm a problem solver, hard worker, and passionate about learning the latest technologies. I'm seeking to create web apps that serve millions of people with awesome UI/UX and responsive apps to help in their life and make them more efficient and easier.

PROJECTS

- **Smart-Brain** (<https://smart-brainssss.herokuapp.com>)
 - Smart Brain is a web app that uses the Clarifai API to locate a face in a picture.
 - Utilised: React, Particles js, Tilt, Tachyons, ES6, Node js, Express js, Bcrypt, PostgreSQL, Git, Github, Heroku.
- **Instagram-Clone** (<https://instagram-clone-bd071.web.app>)
 - This is Instagram clone. give it a try! you can check it and create your own account to see the other users posts and interact with and also you can upload your first post to let everybody see it.
 - Utilised: React, Material UI, ES6, Firebase, Git, Github.
- **Crazy-Dolphin** (<https://mahmoudzanoun13.github.io/crazydolphin>)
 - This website for a tourism company. It supports ten different languages. And have several features such as Online Payment.
 - Utilised: React, I18Next, I18Next-Browser-Languagedetector, I18Next-Http-Backend, React-I18Next, React-Router-Dom, React-Router-Hash-Link, Tailwindcss, Tailwind-Elements, ES6, Git, Github.
- **Robo-Friends** (<https://mahmoudzanoun13.github.io/robofriends>)
 - Create-react-app project that, fetch APIs and allows the user search the fetch. it's for fun.
 - Utilised: React, Tachyons, ES6, Git, Github.
- **Eye4Media** (<https://mahmoudzanoun13.github.io/eye4media>)
 - This is a test website for a startup company. It's fully responsive on all screens.
 - Utilised: HTML, SCSS, ES6, Git, Github.
- **Easybank** (<https://mahmoudzanoun13.github.io/easybank>)
 - This design developed for a landing page for a bank. it was just a challenge from FrontEndMentor.
 - Utilised: HTML, SCSS, ES6, Git, Github.

Note: this design only fits on specific screens.
- **Red-Store** (<https://mahmoudzanoun13.github.io/redstore>)
 - This is just a simple store landing page (e-commerce website).
 - Utilised: HTML, CSS, Git, Github.
